

AHS Series of Adjustable Height Sinks

Chaparral'sTM AHS series of Adjustable Height Sinks provide an innovative solution to help minimize safety hazards and maximize ergonomic benefits in the workplace. The AHS series of sinks feature 6 inches of vertical height adjustment in order to accommodate users of various heights. The sinks reduce the need for excessive bending and reaching, thereby improving workplace ergonomics and helping to reduce safety hazards associated with washing sharp or dangerous objects. Below are a few features of the AHS series of Adjustable Height Sinks:

6" of work surface height adjustment to accommodate medical staff of various heights

- 6" of effortless vertical work surface adjustment facilitates a more safe, efficient, productive and comfortable work environment
- Helps ease neck and back strain by reducing stooping, bending and reaching
- 2-bowl and 3-bowl models available
- UL listed
- Seismically engineered and OSHPD approved
- Designed with water containment edges and ample drain board surface space
- Manufactured in the USA out of fully-welded T304 stainless steel (T316 stainless available for highly corrosive environments)
